Education

Sardar Patel Institute of Technology (S.P.I.T.)
Bachelors of Computer Engineering
Minor in Internet of Things

Aug'23 – Present
Mumbai, India
GPA: 8.20

Projects

- CareerPath360.AI** | *React.js, Tailwind, Node.js, MongoDB, Python, NLP, REST APIs* *Aug'25 – Dec'25*
- Designed and developed a **Python-based ML microservice** using **FastAPI** and **REST APIs** for resume parsing, ATS scoring and job matching, integrated with resume builder workflow.
 - Used **NLP** with **Sentence Transformers (BERT)** and **feature engineering** for skill extraction and measuring semantic similarity between resumes and job descriptions.
 - Trained and integrated an **XGBoost** model with a **hybrid ML + rule-based scoring pipeline**, for generating realistic ATS scores with **robust fallback mechanisms**.
 - Incorporated **Google Gemini API** for context aware, AI-driven career guidance, resume improvement suggestions and intelligent job analysis and matching.
- P2P Rental MarketPlace** | *JavaScript, React.js, MySQL, Node.js, Express.js* *April'25*
- Developed a full-stack peer-to-peer rental platform enabling users to list, discover, and rent items using **React.js**, **MySQL**, and **Node.js**, enabling users to discover, rent and share items.
 - Integrated **Google's Gemini AI API** to develop an intelligent in-app assistant that answers user queries about rentals, listings, policies, and booking help via natural language prompts.
 - Implemented user trust mechanisms such as **verified profiles, reputation scores, and secure in-app chat** to enhance transparency and reduce friction in rentals.
- Cryptocurrency Prediction and Analysis** | *Python, NumPy, Pandas, Scikit-learn, Tkinter* *Oct'24 – Feb'25*
- Performed **Exploratory Data Analysis (EDA)** using **NumPy** and **Pandas**, and engineered features like open-close, low-high, and is-quarter-end to improve model accuracy.
 - Trained a **Random Forest Classifier** using **Scikit-learn**, and evaluated it with **F1 Score, Confusion Matrix, and ROC-AUC curves**.
 - Created a Python-based GUI using **Tkinter** with real-time prediction and 10+ interactive data visualizations using **Matplotlib** and **Seaborn**.
- Franchise Management** | *MySQL, HTML, CSS, PHP* *Sep'24 – Dec'24*
- Built a full-stack web-based franchise management system with multi-role dashboards (Admin, Distributor, Franchise Owner, Customer) using **PHP, MySQL, HTML, and CSS**, hosted locally via XAMPP.
 - Designed and implemented a **3NF MySQL** database schema to manage inventory, sales, staff, and user access efficiently, using foreign keys, indexing, and optimized SQL queries.
 - Integrated secure login with session handling, real-time data display, and dynamic forms through **PHP**, ensuring smooth role-based access and dashboard-specific functionalities.

Skills

Languages: Java, Python, JavaScript, C, HTML, CSS
Frameworks & Libraries: React.js, Node.js, Express.js, FastAPI, REST API, Tailwind CSS, NumPy, Pandas
Databases & Tools: MySQL, MongoDB, PostgreSQL, Git, GitHub
Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Agile Development, Database Management Systems, NLP, Machine Learning

Certifications and Achievements

SCOPE - Certification by JP Morgan Chase in Agile methodology and Cloud. *Aug'24 – Present*
JEE - Secured a rank of 33.1k across India in JEE-Mains and qualified for JEE Advanced. *Jun'23*

Positions Of Responsibility

- S.P.I.T. Placement Office - Training & Placement Coordinator** *Dec'23 – Present*
- Served as the primary Point of Contact between recruiters and students, managing campus drives and pre-placement sessions and analyzing placement data to identify target companies.
- S.P.I.T. Sports Committee - Head of Marketing and Tournament Admin** *Sep'23 – Aug'25*
- Led marketing, PR and event operations for large-scale sports events, including a Half Marathon (1,500+ participants) and Spoorthi Sports Fest (5,000+ participants), ensuring seamless execution and strong brand visibility.
